OBJECTIVE

Product-focused individual skilled at solving user problems with data-informed solutions. Quant research background sharpened analytical rigor, and hands-on hackathon and leadership experience built strong user empathy — seeking a Product Intern role at Khatabook to bring data-driven thinking to empowering India's MSMEs.

EDUCATION

B.Tech, Computer Science (AI & ML) — VIT Bhopal University

2023 – Present | CGPA: 8.90

SKILLS

Hard Skills: MS Excel, MS PowerPoint, Canva, Notion, Figma, Python, SQL

Soft Skills: Leadership, Collaboration, Communication, Analytical Thinking, Detail-Oriented

Leadership Qualities: User Empathy, Cross-Functional Team Player

EXPERIENCE

Quant Intern — Stock Vertex Ventures, Indore, MP

May 2026 – June 2026

- Trained in advanced Python & Pandas for stock and financial analytics; performed data cleaning, transformation, and feature extraction on market-related datasets
- Built a Streamlit stock analysis dashboard for company announcements; automated metric extraction with Google Gemini LLM and enabled interactive filtering and downloadable outputs

General Secretary — UX Club, VIT Bhopal University

June 2025 – April 2026

- Led end-to-end planning and execution of campus events, coordinating cross-functional teams, task allocation, and timely delivery of objectives
- Collaborated with 200+ participants and 50+ club members to streamline communication and enhance event execution

PROJECTS

Stock Analysis Dashboard — [Live Demo](#)

- Developed an AI-powered financial dashboard using Streamlit and Gemini LLM to parse unstructured company announcements and extract key metrics (investment amounts, capacity additions)
- Automated manual data extraction, delivering a live, interactive dashboard with downloadable data export

ADDITIONAL HIGHLIGHTS

- Led ideation on a virtual try-on concept at Myntra Hackathon; cleared Round 1
- Invited and hosted external guests as a speaker at club events, both online and offline
